## Forward

In recent years, the real estate industry has undergone a significant transformation. As urbanization accelerates and environmental concerns become more pressing, the need for sustainable practices in real estate management has never been more critical. "Sustainable Real Estate Management" is a timely and essential guide that addresses these challenges head-on, providing invaluable insights and practical strategies for integrating sustainability into the heart of real estate operations.

This book arrives at a pivotal moment. Climate change, resource depletion, and social inequities are no longer distant threats but present realities that demand our immediate attention. The built environment plays a crucial role in this landscape, contributing significantly to global carbon emissions, energy consumption, and waste production. As stewards of this environment, real estate professionals have a unique responsibility and opportunity to lead the charge towards a more sustainable future.

"Sustainable Real Estate Management" delves into the core principles of sustainability, presenting a comprehensive framework that encompasses economic, social, and environmental dimensions. By exploring the economic benefits of sustainable practices, such as reduced operational costs and increased property value, this book makes a compelling business case for sustainability. It also highlights the social imperatives, emphasizing the importance of creating inclusive, healthy, and resilient communities. Finally, it addresses the ecological impact, offering strategies to minimize resource use, reduce emissions, and protect natural habitats.

What sets this book apart is its practical approach. The author provides real-world examples, case studies, and actionable insights that empower readers to implement sustainable practices effectively. Whether you are a portfolio manager, asset manager, sustainability manager, property manager, developer, investor, or policymaker, this book offers the tools and knowledge you need to make informed decisions that align with sustainability goals.

Moreover, "Sustainable Real Estate Management" is not just about mitigating negative impacts but about embracing a proactive and innovative mindset. It encourages us to rethink traditional models and explore new paradigms that prioritize long-term value over short-term gains. By fostering collaboration, leveraging technology, and engaging with stakeholders, we can unlock new opportunities for sustainable growth and development.

As you embark on this journey through the pages of "Sustainable Real Estate Management," I encourage you to reflect on your role in shaping the future of our built environment. The path to sustainability is not without its challenges, but it is a path

worth taking. Together, we can build a world where economic prosperity, social well-being, and environmental stewardship go hand in hand.

This book is a testament to the dedication and vision of its authors, who have provided a roadmap for a more sustainable real estate industry. It is a call to action for all of us to rise to the occasion and contribute to a legacy of sustainability that will benefit generations to come.

Let us embrace this challenge with determination and optimism, knowing that our efforts today will pave the way for a brighter, more sustainable tomorrow.

# Contents

Author, Deniz Karahan.....	4
Forward.....	5
Contents .....	7
1. Real Estate Management.....	17
1.1 Investment Management .....	20
1.2. Fund Management.....	27
1.3 Portfolio Management.....	33
1.4 Asset Management .....	40
1.5 Property Management.....	46
1.5.1 Property Management Organization Structure .....	49
1.5.2 Property Management Process .....	51
1.5.3 Property Management Information System.....	59
1.5.4 Property Database.....	61
1.5.5 The development of a customized property management platform.....	63
1.6 Facility Management.....	65
2. Sustainability relevant characteristics of real estate .....	67
3. Definition and concepts of sustainability in the real estate context.....	69
4. Challenges and Barriers to Sustainability in Real Estate .....	71
5. Relevance and benefits of sustainability aspects in the real estate cycle .....	73
6. Concept for ecology, economy and society .....	75
7. Sustainable Real Estate Investment .....	78
8. Goals of sustainable real estate management.....	80
9. Regulatory and Policy Frameworks.....	83
10. Guidelines and areas of action for sustainable real estate management.....	84
11. Integration into corporate strategy and decision-making processes.....	86
12. Sustainability controlling and key figures.....	88
13. Life cycle cost and economic considerations .....	90
14. Sustainable procurement .....	92
15. Application of the polluter pays principle .....	95
16. Recycling and the circular economy.....	97
17. Case Studies in Sustainable Real Estate.....	99
18. Sustainable Property Management Practices .....	102
19. Metrics and Performance Evaluation.....	104
20. Sustainable Property Technology .....	106
21. Digitalization and Innovative Solutions .....	109

22. Digital Transformation in Real Estate .....	112
22.1 Data Management in Real Estate Portfolio .....	115
22.2 Data Management Process .....	121
22.3 The Technologies and Methods.....	125
22.3.1 3D Modelling .....	125
22.3.2 3D Printing .....	127
22.3.4 Application Program Interfaces .....	128
22.3.5 Artificial Intelligence .....	128
22.3.6 Software as a Service (SaaS) .....	130
22.3.7 Platform as a Service (PaaS).....	131
22.3.8 Infrastructure as a Service (IaaS).....	133
22.3.9 Software Infrastructure as a Service (SlaaS) .....	135
22.3.9 BIM (Building Information Modeling).....	137
22.3.10 Digital Twin.....	137
22.3.11 Geospatial .....	138
22.3.12 Internet of Things.....	138
22.3.13 Location Analytics .....	142
22.3.14 Machine Learning .....	143
22.3.15 Prefabrication.....	144
22.3.16 Modular Building .....	145
22.3.17 Property Identity .....	145
22.3.18 Robotics .....	145
22.3.19 Micro-Sensor Technology and Its Impact on Real Estate through IoT .....	146
23. Data Analytics in Real Estate .....	148
23.1 Big Data Analytics Sector .....	148
23.2 Why do we need big data analytics?.....	151
23.3 Big Data.....	155
23.3.1 Big data process.....	159
23.3.2 Leveraging Data for Sustainable Management in Real Estate Funds .....	161
23.4 Application programming interface.....	168
23.4.1 How does an API work?.....	169
23.4.2 Why do we need APIs? .....	170
23.4.3 Types of APIs .....	171
23.4.4 Types of API protocols .....	173
23.4.5 APIs, web services, and microservices .....	174
23.4.6 APIs and cloud architecture .....	175

23.5	Creating a powerful management platform .....	175
23.6	Internet of Things .....	177
23.6.1	Machine learning and IoT .....	178
23.6.2	IoT Stream and Uncertainty .....	179
23.7	Data Analytics Methods and Categories for IoT .....	179
23.8	IoT architecture .....	183
23.8.1	Cloud Computing .....	184
23.8.2	Edge Computing .....	188
23.8.3	Fog Computing .....	192
23.9	Open Data .....	193
23.10	Predictive Analytics .....	197
23.10.1	Predictive analytics methods .....	201
23.10.2	Data Management Process .....	203
23.11	Using ChatGPT and Artificial Intelligence .....	207
24.	How to find out sustainable value of buildings? .....	215
24.1	Automated Valuation Model .....	218
24.2	Sustainability Assessment Methodology for Buildings .....	222
24.3	Sustainability .....	226
24.4	Assessment Methodology .....	228
24.5	The goals of sustainability assessment methodology .....	228
24.6	Sustainability Levels in assessment methodology .....	229
24.7	Sustainability Indicators in assessment methodology .....	230
24.8	Development of sustainability factor and integration into the valuation methods .....	239
24.9	Sales Comparison Approach .....	241
24.10	Discounted Cash-Flow Method (DCF) .....	241
24.11	Discounted Cash Flow Nominal Approach .....	244
24.12	Discounted Cash Flow Real Approach .....	246
24.13	Sustainability Assessment Methodology .....	248
24.14	Real Estate Sustainability Valuation with DCF-Method .....	248
25.	Sustainable Buildings .....	251
25.1	The characteristics of buildings .....	251
25.2	The triple bottom line of sustainable buildings .....	254
25.3	The ecological pillars of sustainable buildings .....	255
25.4	The economic and social pillars of sustainable buildings .....	257
25.5	The physical characteristics of buildings .....	258
25.6	What influences the sustainability degree of the building? .....	259

25.7	The key performance indicators of sustainable buildings .....	264
25.8	Sustainability assessment and considered Building modules.....	265
25.9	The consumption and emission shares in the lifespan of building.....	266
25.10	Energy Production in Buildings .....	266
25.11	Strategies to Reduce Energy Demand in Buildings.....	271
25.12	The lifecycle cost analysis of buildings .....	273
25.13	How much does the lifecycle cost a building?.....	273
25.14	Sustainable transformation of buildings .....	274
25.15	Sustainable Building Design and Construction .....	279
25.16	The Economic Aspects of Sustainable Buildings .....	282
25.17	Economic performance of sustainable buildings .....	284
25.18	The economic benefits of sustainable buildings.....	285
25.19	Sustainable transformation of real estate portfolio .....	287
25.20	The sustainable measures in the real estate and construction sectors.....	287
25.21	Sustainable Urban Development .....	296
26.	Sustainability Reporting for real estate funds and portfolios.....	298
26.1	Basics .....	302
26.1.1	Subject .....	302
26.1.2	Scope .....	303
26.1.3	Companies and organizations subject to reporting requirements .....	303
26.1.4	Sustainability relevance.....	304
26.1.5	The sustainability-related product and service.....	305
26.1.6	Publication.....	305
26.1.7	Retention Period.....	306
26.1.8	Report content .....	306
26.1.9	The responsible board member of sustainability.....	306
26.1.10	Independence .....	307
26.1.11	Confirmation from the auditing firm .....	308
26.1.12	Sustainability policy.....	308
26.1.13	Sustainability strategy.....	309
26.1.14	Sustainability goals.....	311
26.1.15	General Goals .....	311
26.1.16	Direct and Indirect Investments .....	313
26.1.17	Legal Compliance.....	313
26.1.18	Compliance with Standards .....	315
26.1.19	Key figures and performance indicators .....	316

26.2 Company.....	319
26.2.1 Governing body .....	319
26.2.2 Core business .....	320
26.2.3 Accountability .....	320
26.2.4 Environmental, social and governance aspects .....	320
26.2.5 Materiality analysis.....	321
26.2.5 Duty of care.....	321
26.2.6 Risks and opportunities .....	322
26.2.7 Ethical behavior .....	322
26.2.8 Prevention against deception.....	322
26.2.9 Own property .....	323
26.2.10 Working conditions.....	323
26.2.11 Health and Safety .....	324
26.2.12 Social justice and equal opportunities.....	325
26.2.13 Diversity, equality and inclusion .....	325
26.2.14 Cyber security and data protection.....	326
26.2.15 Corruption and bribery.....	327
26.2.16 Training and further education.....	327
26.2.17 Turnover and retention.....	328
26.2.18 CO2 emissions .....	328
26.2.19 Energy efficiency and resource conservation .....	329
26.2.20 Water consumption .....	329
26.2.21 Amount of waste .....	330
26.2.22 Amount of wastewater .....	330
26.2.23 Supply chain .....	330
26.2.24 Three-year comparison.....	332
26.3 Real Estate Portfolio.....	332
26.3.1 Sustainability policy .....	332
26.3.2 Sustainability strategy .....	333
26.3.3 Sustainability goals .....	335
26.3.4 Obligation to keep inventory.....	337
26.3.5 Existing properties.....	338
26.3.6 Transactional properties .....	338
26.3.7 Properties without heating requirements .....	339
26.3.8 Property .....	339
26.3.9 Demolition .....	339

26.3.10 Evaluation of the properties .....	339
26.3.11 Due diligence .....	340
26.3.12 Vacancy rate.....	340
26.3.13 Investment class real estate key figures .....	341
26.3.14 Portfolio and fund metrics .....	342
26.3.15 Building metrics .....	344
26.3.16 Social aspects.....	345
26.3.17 Materiality analysis .....	346
26.3.18 Circular economy .....	347
26.3.19 CO2 emissions .....	347
26.3.20 Environmental footprint .....	348
26.3.21 Environmental risks .....	349
26.3.22 Energy data and measurement period .....	349
26.3.23 Energy efficiency measures and energy production.....	351
26.3.24 Energy efficiency requirements .....	351
26.3.25 Water consumption .....	352
26.3.26 Wastewater volume .....	353
26.3.27 Waste volume .....	353
26.3.28 Biodiversity .....	354
26.3.29 Accessibility.....	354
26.3.30 Health and wellbeing.....	355
26.3.31 Noise pollution.....	355
26.3.32 Natural disasters .....	356
26.3.33 Mobility.....	356
26.3.34 Use and development.....	356
26.3.35 Construction and sustainable materials .....	357
26.3.36 Initiatives and partnerships .....	358
26.3.37 Integration and diversity.....	358
26.3.38 Community .....	358
26.3.39 Design .....	358
26.3.40 Tenant involvement.....	359
26.3.41 Monitoring.....	360
26.3.41 Innovation .....	360
26.3.42 Three-year comparison.....	361
27. Audit.....	361
27.1 Report review and audit security.....	363

27.1.1 Limited testing .....	363
27.1.2 Negative statement .....	364
27.1.3 Reduced workload .....	364
27.1.4 Efficiency in testing .....	364
27.1.5 Scope of the audit procedures .....	364
27.1.6 Scope of application.....	365
27.1.7 Adequate testing .....	365
27.1.8 The procedure .....	366
27.1.9 Workload .....	366
27.1.10 Positive statement.....	366
27.1.11 Measurement of the test object.....	367
27.12 Requirements .....	367
27.1.13 The responsible sustainability partners .....	368
27.2 The obligation to the auditors and the audit firms .....	368
27.2.1 Exam level.....	368
27.2.2 Independence .....	369
27.2.3 Professional secrecy .....	369
27.2.4 Dual activity .....	370
27.2.5 Financial interest.....	370
27.2.6 Either - Or principle .....	371
27.2.7 Confirmatory opinion.....	371
27.2.8 Reliability.....	371
27.2.9 Judgment of conformity .....	372
27.2.10 Quality assurance.....	372
27.2.11 Invalidity of the confirmation opinion.....	373
27.2.12 Removal.....	374
27.2.13 Liability .....	374
27.2.14 Deadline .....	375
27.2.15 Duty of care.....	376
27.2.16 fees.....	376
27.2.17 Confirmation act .....	377
27.2.18 Expertise .....	377
27.2.19 Examination standards .....	378
27.2.20 Audit note .....	379
27.2.21 non-audit services.....	379
27.2.22 Report.....	380

27.2.23 Knowledge .....	380
27.3 Permission .....	381
27.3.1 Execution .....	381
27.3.2 The responsible sustainability partners .....	382
27.3.3 Audit firm .....	382
27.3.4 Responsible audit partner .....	383
27.3.5 Competent authority .....	383
27.3.6 Qualification .....	384
27.3.7 Training .....	384
27.3.8 Continuing education .....	385
27.3.9 Qualifying Examination .....	386
27.3.10 Written exam .....	386
27.3.11 Theoretical exam .....	387
27.3.12 Equivalent degree .....	387
27.3.13 State recognition .....	388
27.3.14 Practical training .....	388
27.3.15 Recognition of professional activity .....	389
28. Building a Sustainability Management Platform .....	390
28.1 Monitoring: .....	390
28.2 Controlling: .....	393
28.3 Tracking .....	397
28.4 Evaluation .....	400
28.5 Key Components of a Sustainability Management Platform .....	404
28.5.1 Data Collection and Integration .....	404
28.5.2 Data Storage and Management .....	404
28.5.3 Data Warehousing .....	408
28.5.4 Security Protocols .....	411
28.5.5 Analytics and Reporting .....	415
29. Solution for Sustainable Real Estate Management .....	431
29.1 Organisation Structure .....	431
29.2 Division of Tasks .....	432
29.2.1 Action Plan for Developing and Expanding Sustainability Performance .....	432
29.2.2 Tasks of Fund Managers .....	436
29.2.3 Tasks of Portfolio Managers .....	438
29.2.4 Tasks of Asset Managers .....	440
29.3.5 Tasks of Property Managers .....	442

29.3 Management Platform.....	444
29.3.1 Dashboard .....	444
29.3.2 Real Estate Asset Class .....	446
